The Most Important Medica

Achievement of the 20th Century.

For the past fifty years medical scientists have worked steadily with the view of devising a method of direct medication, that is, a method by which medicinal substances could be administered directly into the blood, the part or organ diseased First came the hypodermic syringand the administration of curative agents under the skin or directly into the diseased organs. Some ten years ago the administration of saline solutions directly into the blood stream was advocated and practiced. Since this time medical science has gradually progressed until at the present time the direct method of medication has been perfected and has about taken the place of the old quackish way of treating many of the vital diseases. And why not? It is the more exact, safe and rational way of combating diseases, especially those caused by germs cir. culating in the blood,

DO YOU SUFFER RUPTURE

Ninety per cent of the human race suffer from one of these dreadful diseases. If you are one of them you should consult me at once. Delay is dangerous. I positively cure without the use of a knife. Hundreds of my patients are ready to testify as to my ability to cure, and I can furnish unlimited testimonials on file in my office.

Consider this. The reasonable fee asked stays right in your bank until you are CURED. You assume no risk. You are subjected to no pain. You are exposed to no danger. You waste no valuable time. You secure life-long protection. An ideal method of treatment, ideally presented. There is not see and treat you personally each one single objection. Not one sound, logical reason you should not accept my offer and be cured. Accept it now.

WHERE HUNDREDS HAVE BEEN CURED IS A SAFE PLACE FOR YOU TO GO.

We will accept any case of Rupture, Piles, Varcocele or Hydrocele and permit you to deposit a traft in the First National Bank, or your Bank, made payable to yourself and instructing them to place same to our account after you have been cured. We are the only reputable physicians in this line of work who will take such cases on a quarantee. By doing this, you are absolutely certain of a cure. You have nothing to lose and everything to gain, and if we were not perfectly sure of our work we could not do business this way very long, but instead, have been doing so for years. We have adopted this plan because so many have been swindled by quacks and fakers; not one of them will permit a patient to deposit his money until a cure has been effected.

Many patients have told us that at first they hesitate to begin treatment with us, fearing that on account of our great reputation the fee would be more than they could afford to pay. Our fees are always moderate, wholly within your means, and at no time more than you are willing to pay. DON'T let money matters keep you from beginning treatment. If you will call and see us we have a system by which you can begin treatment and pay as you can.
